Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Murphy et al. (U.S. 4,776,389).

Murphy discloses a method and apparatus for evacuating and filling heat pipes comprising all of the applicant's claimed and disclosed limitations of the instant invention (column 3, lines 5-36).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murphy et al. (U.S. 4,776,389) in view of Luo (U.S. 6,827,133).

Murphy's invention discloses all of the claimed limitations from above except for the bottom of the hollow pipe is integrally connected therebeneath with a plate to render

the hollow pipe to be welded onto the plate to increase heat-sinking effect; and the hollow pipe is connected therebeneath with a heat-producing article when in use.

5. However, Luo teaches the bottom of the hollow pipe being integrally connected therebeneath with a plate to render the hollow pipe to be welded onto the plate to increase heat-sinking effect; and the hollow pipe is connected therebeneath with a heat-producing article when in use.

Given the teachings of Luo, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the heat pipe of Murphy with the bottom of the hollow pipe being integrally connected therebeneath with a plate to render the hollow pipe to be welded onto the plate to increase heat-sinking effect; and the hollow pipe is connected therebeneath with a heat-producing article when in use.

Doing so would provide a thermally efficient heat pipe for dissipating heat from heat generating objects.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references cited on the USPTO 892 discloses related limitations of the applicant's claimed and disclosed invention.
